

outerspace!

We wish you a lot of fun and an exciting expedition into

discover at *Space for Kids*!

Let's go on a journey into the future and discover the

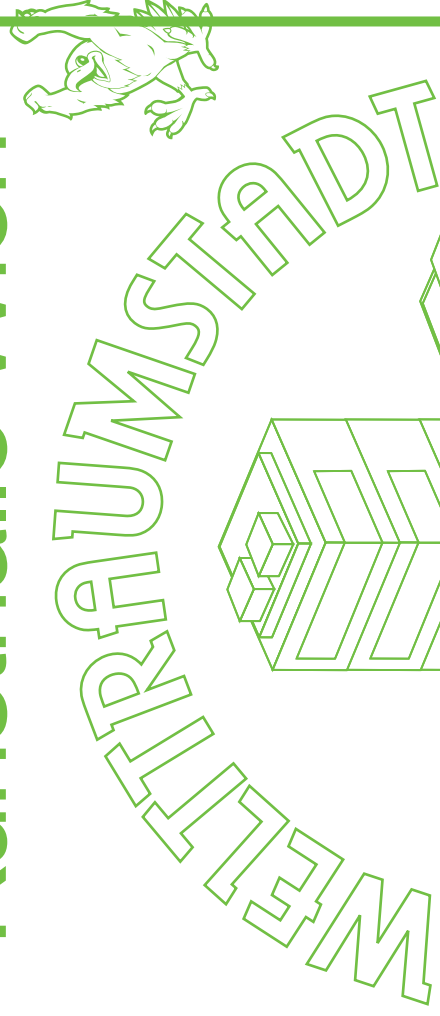

City of Your Dreams! We have a few tricky tasks for you

and we are already curious about what else you will

Space for Kids!

Hallo, Hi, привѣт, Ciao, Salut, 你好, もしもし,
Merhaba, مرحبا, Bok, Alo, Здраво, ¡Hola!, Hey, Hello,
Здравејте, Cześć, नमस्ते , Ahoj at Kunsthalle Wien's
Space for Kids!

Kunsthalle Wien

A Space for Kids booklet for children and all
those who feel like taking part.

SPACE FOR KIDS

Museumsquartier #KidsSpace

2/7 – 2/9 2018

Did we forget something? What else would you take
with you?

We have already packed our suitcase for the journey
into the future. What's hidden in it?

Start your spaceship and fly back to Earth.

Thank you for participating! We hope you enjoyed
the journey through the exhibition and hope to welcome
you back at Kunsthalle Wien soon.

DER STANDARD

Ö1 CLUB

In the exhibition, you will find a wall covered by pictures of buildings that we have collected. Which one do you find most exciting?

In which one would you like to live? Which would you not? And why?

(Tip: You will find a number on each picture. The numbers are listed on a separate sheet of paper on this wall, it shows you the name of the architect or artists, and the building).

Have you already discovered the video *Western* by artist Hans Schabus? You can see how he made a voyage of discovery through the Vienna River with a homemade small sailboat. Draw a picture of a vehicle for the future that you want to invent!

Where would you go with it, and are there any special tricks your vehicle is able to do?

In the video *Die Rechte des Gehsteigs* (The Rights of the Sidewalk) by artist Anna Witt we hear a policeman who lists what you must not do on a sidewalk. There are quite a lot of rules that have to be followed.

In your City of the Future, which rules would you immediately get rid of – and is there anything that has to be allowed or forbidden?

Music for the Plants!
In Ralo Mayer’s video you can see how scientists have tried to recreate our habitats – the so-called ecosystem – in a huge glass house. The goal was to find out if you can do long-term travel into space. They have set up rooms for different climatic zones of the earth: There was a savannah, an ocean, a tropical rainforest, a mangrove swamp and also a desert landscape. The scientists have also farmed and furnished living spaces. Overall, the scientists have settled there 3,800 different animal and plant species.

We will also try to grow plants in our *Dream City*, but that’s not so easy in a building without sunlight! Maybe it will help if we make music for the plants?

It would be great if you help us with our experiment and sing a song to one of the plants.
